

LOVE DOLLS

- How to properly handle your love dolls -

Assembly Before the fun begins

Your love-doll comes in two parts.
The head and the body.

First you need to assemble the head of the doll.
For this you put the head on the provided neck.

Now your doll is ready for some fun.

Plesure For the maximum pleasure

You can put the love doll in various positions – this is made possible by the metal skeleton inside. Now you can start the experience in your favorite position.

We recommend to put the doll only in positions that would also be possible for a real person. So we can ensure the longlivity of the metal skeleton.

Furthermore it is recommended, that you move the doll back into the original position after you had some fun.

There are many possible ways to pleasure yourself. You can satisfy her anally and vaginally. The anus and vagina are designed to feel as realistic as possible. You like it oral? Then have fun with the mouth of the doll. Of course, there are countless other ways to feel pleasure with the doll - butt, breasts and so on.

To make it as pleasant as possible for you, it is highly advisable to use a lubricant, ideally a water-based one. These lubricants have the advantage that they are gentle to the material and to your skin. In addition, water-based lubricant is very easy to remove - clear water is adequate.

For a genuine experience the doll has a suitebale weight. To move the doll, we recommend a classic office chair on wheels - put the doll on the chair and you can easily roll it around the apartment.

You can control the twist function using the provided remote control.

With the buttons A to C you can start an in-tensity level, ascending from A.
You can switch the function off with the D button.

Clean How to clean the love doll

For a really good result you should get a sextoy cleaner, so you can clean the doll thoroughly and gently.

It is best ay to make the cleaning process as easy as possible is to place your doll in the shower (take off the hair first) on a plastic chair or stool. Now you can rinse the doll with lukewarm water. *Then apply the appropriate cleaner (do not use an aggressive/caustic cleaner) and clean the doll according to the cleaning recommendation.* You should basicly clean the doll as you would clean yourself.

With a rod attachment for your shower you can also get into all openings of the doll and give it a proper wash.

After cleaning, the doll should be dried throughoutly. The best way to dry your love doll is with a lint-free cloth or a hair dryer (cold air).

When the doll is dry, we recommend to use some baby powder what makes your love doll last even longer.

storage How to store the love doll

After you have thoroughly cleaned the doll and it is sufficiently dry, it is time to store your love doll till the next time you will use it. Before you put the doll away, you should be sure that you do not want to use it again soon. It may be enough to leave it next to you in bed or on the sofa. For easy transport around the house, you can also put the doll on a chair with wheels - so you can roll it wherever you need it.

If you want to store it for a longer period of time, then you can put it back into the shipping box - maybe it is necessary to dismantle the head. For optimal storage, wrap the doll in a lint-free blanket. This protects the love doll from dirt and getting damaged. Store the wrapped doll in a dry, dark playe.

Do not forget that other sex toys - for example, made of silicone - should not be in contact with the doll if you store it. The contact can cause the plasticizers in the toy to damage the material of the doll.

SICHERHEITSHINWEISE

- Safety First -

Read the safety instructions carefully before use and follow them to ensure safe use.

1. The sex doll is only suitable for adults and the stimulation of the penis. The use by minors is not permitted or intended. Keep the sex doll away from small children.
2. In case of inflammation or other irritations in the intimate area, you should refrain from using it, in this case it is advisable to use the sex doll only when you are physically in the appropriate condition.
3. If you experience any discomfort before or after use, you should consult a doctor under certain circumstances.
4. Check your sex doll for any damages before use. Despite our high quality standards, the sex dolls can have a defect. These can cause an unpleasant sensation during use and can also lead to injuries or irritations.
5. Store your sex doll at room temperature and avoid high temperatures as well as dust. Avoid exposing your sex doll to direct sunlight for long periods of time.
6. For the best possible use and the longest lifespan of the sex doll, we recommend the use of water-based lubricant. This protects the skin and the material of the sex doll.
7. Cleaning by steam, dry sterilization or boiling is not recommended, as this can lead to irreparable deformation or defects of the material. Cleaning in a dishwasher or washing machine should also be avoided.
8. In case of a nail breaks off the doll or if you want to attach the doll's hair permanently we recommend a TPE glue, which you can buy in specialized shops.

For further information and tips on cleaning, please refer to the cleaning instructions.
